

Workshop on Self-rolled-up 3D Technology

Wednesday, May 21, 2014

8:30am- 5:00pm

1000 Micro and Nanotechnology Laboratory

208 N. Wright Street, Urbana, IL 61801

This is the first workshop on strain induced self-rolled-up 3D architectures – a new paradigm for extreme miniaturization and integration of photonic, electronic, and mechanical components, as well as biomedical applications. The main goal of this workshop is to bring together experts and identify critical challenges and opportunities in this emerging field.

Partial list of invited speakers:

Max Lagally, *University of Wisconsin, Madison*

Feng Liu, *University of Utah*

Zetian Mi, *McGill University, Canada*

Oliver Schmidt, *Ifw-Dresden, Germany*

Justin Williams, *University of Wisconsin, Madison*

John Rogers, *University of Illinois*

Jimmy Hsia, *University of Illinois*

Oliver Chen, *University of Illinois*

Organizing committee:

Xiuling Li, Jimmy Hsia, John Rogers, Jose Schutt-Aine,

Oliver Chen, and Placid Ferreira

Workshop Contact:

Kelly Foster, foster5@illinois.edu

Phone 217 300-1834

Sponsors:

College of Engineering, Strategic Research Initiative

Micro and Nanotechnology Laboratory and nano@Illinois.edu
